

# MINE

The secrets To The Power of Changing the World  
— The New Cryptocurrency

We are using the supply of capital and funds from the ICO to construct enormous mining farms, and with the cryptocurrency generated from mining, depending on the amount generated from the main project "MINE", we are going to divide it everyday. Furthermore, to make the mining farm automatically generate investments again and again, the value will and should constantly go up. With the carriers of MINE, they should make their own wallet for the dividends from the mining farm. To withdraw from the wallet freely, they should also make a debit card for the same purpose. To achieve our goal "A world that widely uses cryptocurrency", we are constructing it with the best liquidity and convenience for everyone.

## Constructing the Mining Farm

The 70% of capital generated from the supply of ICO is used on constructing the mining farm. The mining industry is said to have a 10% monthly profit, and technically it is possible to construct a semi-permanent organization that continues to gain its profit on its own.

A Token Sale with a Supply of 100 million Dollars

With a monthly profit of 10%, The amount of mining ethereum monthly at a Mining farm will be 10% of the 70 million dollar, which is 7 million dollars

## The Distribution of Mine to the Mine Carriers from the Re-Investment of the Mining Industry

70% of the monthly mining supply will go to the investments, with 20% distributed to the MINE carriers. 10% will be the MINE carrier's common property. This is for the purpose of operation, in which savings will be there to prevent the value of MINE to drop.

## Direct Debit is Made Possible with The MINE Debit Card

To try to get the dividends with the currency generated by mining, we require that we keep the MINE from the MINE Wallet that we offer. Moreover, the MINE carriers should be able to use and own the MINE debit card, which has the function of using the cryptocurrency to pay, and is a VISA debit card.

## Roadmap

### 2017 Q3

- Huge Scope of Mining Farm Construction
- Started Ethereum Mining

### 2018 Q1

- Acquired sites for MINE farms
- Acquired business permit for MINE farms

### 2018 Q3

- Release alpha version of MINE Wallet
- Begin taking applications for MINE card
- Release MoT hardware wallet
- Set up MINE mining pool
- Set up GPU mining equipment, test run
- Listed on exchanges

### 2017 Q4

- Acquired Bank License

### 2018 Q2

- Publish website and white paper
- Conduct token sale
- Token distribution
- Construction of MINE farm

### 2018 Q4

- Release official version of MINE Wallet
- Begin distribution of MINE card
- Begin operation of mining farm
- Begin distribution of MINE

## Token Sale

Usually the ICO, no matter the issue subject or the involved parties, should have a certain amount of tokens. However, with this project, 100% of token sale is distributed to the participants.

Token name	MINE
Symbol	MINE
Token sale amount	2,500,000,000
Token Price	1 MINE = 0.1 dollar
Hard Cap	\$95 million
Token actual equipment	ERC-20
